

MUHAMMAD SUBHAN

Full Stack Developer Lahore, Pakistan

+92 326 5201092 | muhammdsubhan.dev@gmail.com

PROFILE

Innovative Full Stack Developer and Computer Science student with proven expertise in building dynamic, scalable web applications using Next.js and Django. Experienced in developing comprehensive e-commerce platforms, engineering secure REST APIs, and creating responsive, user-centric interfaces. Passionate about applying strong foundations in object-oriented programming and database management to build efficient, real-world digital solutions.

TECHNICAL SKILLS

- **Frontend:** Next.js, HTML/CSS, Tailwind CSS
- **Backend:** Python (Django), REST APIs
- **Databases:** SQL
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering

PROJECTS

E-Commerce Platform | Huzaifa Covers (*Next.js, Django*)

- Developed and deployed a live, full-stack e-commerce website to manage digital sales and product catalogs.
- Integrated a responsive Next.js frontend with a robust Django backend, ensuring fast load times and seamless order processing.

Point of Sale (POS) System | Car Accessories Shop

- Engineered a custom POS and inventory management desktop application currently used by a live client for daily retail operations.
- Streamlined checkout processes and implemented real-time tracking for stock levels, sales, and material costs.

Expense Management System (*Django, Bootstrap*)

- Built a responsive web application to securely track, categorize, and filter financial data.

- Implemented user authentication to provide personalized, dynamic dashboards for managing individual expenses.

EDUCATION

University of Central Punjab | Lahore

BSCS | Oct 2024 – Present

Pursuing a B.Sc. in Computer Science. Focus areas include algorithms, data structures, databases, and web development.

- **Relevant coursework:** Data Structures & Algorithms, Database Systems, Web Development, Software Engineering.
